

CONTENTS

I. Introduction.....	I-1
II. Distributed Production Technologies	II-1
A. Distributed Production Technologies	
1. Novel Catalytic Fuel Reforming, <i>InnovaTek Inc.</i>	II-3
2. Engineering Development of Ceramic Membrane Reactor Systems for Converting Natural Gas to Hydrogen and Synthesis Gas for Liquid Transportation Fuels (ITM Syngas), <i>Air Products and Chemicals, Inc.</i>	II-9
3. Integrated Ceramic Membrane System for Hydrogen Production, <i>Praxair, Inc.</i>	II-14
4. Low Cost Hydrogen Production Platform, <i>Praxair Inc.</i>	II-18
5. Encapsulated Metal Hydride Separation Membrane Development, <i>Westinghouse Savannah River Technology Center</i>	II-23
6. Defect-Free Thin Film Membranes for H ₂ Separation and Isolation, <i>Sandia National Laboratories</i>	II-28
7. Autothermal Cyclic Reforming Based Hydrogen Generating and Dispensing System, <i>GE Global Research, General Electric Company</i>	II-34
8. Hydrogen Technical Analysis: Evaluation of Metal Hydride Slurries, <i>TIAX LLC</i>	II-39
9. Water-Gas Shift Membrane Reactor Studies, <i>National Energy Technology Laboratory</i>	II-45
10. Integrating a Hydrogen Energy Station into a Federal Building, <i>TIAX LLC</i>	II-49
11. Hydrogen from Renewable Energy Sources: Pathway to 10 Quads for Transportation Uses in 2030 to 2050, <i>Directed Technologies, Inc.</i>	II-53
B. Production from Biomass	
1. Biohydrogen Production from Renewable Organic Wastes, <i>Dept. of Civil and Construction Engineering, Iowa State University</i>	II-57
2. Biological Water Gas Shift Development, <i>National Renewable Energy Laboratory</i>	II-62
3. Supercritical Water Partial Oxidation, <i>General Atomics</i>	II-68
4. Biomass-Derived Hydrogen from a Thermally Ballasted Gasifier, <i>Iowa State University</i>	II-73
5. Techno-Economic Analysis of Hydrogen Production by Gasification of Biomass, <i>Gas Technology Institute</i>	II-78
6. Hydrogen from Biomass - Catalytic Reforming of Pyrolysis Vapors, <i>National Renewable Energy Laboratory</i>	II-82
7. Production of Hydrogen from Post-Consumer Residues, <i>National Renewable Energy Laboratory</i>	II-86
8. Fluidizable Catalysts for Hydrogen Production from Biomass Pyrolysis/Steam Reforming, <i>National Renewable Energy Laboratory</i>	II-89
9. Hydrogen from Biomass for Urban Transportation, <i>Clark Atlanta University</i>	II-93
10. Reformer Model Development for Hydrogen Production, <i>Jet Propulsion Laboratory</i>	II-98
C. Photolysis	
1. Maximizing Photosynthetic Efficiencies and Hydrogen Production in Microalgal Cultures, <i>University of California, Berkeley</i>	II-104
2. Algal H ₂ -Production Systems: Creation of Designer Alga for Efficient and Robust Production of H ₂ , <i>Oak Ridge National Laboratory</i>	II-108

CONTENTS (Continued)

II. Distributed Production Technologies (Continued)

- C. Photolysis (Continued)
 - 3. Algal Systems for Hydrogen Photoproduction, *National Renewable Energy Laboratory* II-111
 - 4. Photoelectrochemical Systems for H₂ Production, *National Renewable Energy Laboratory* . II-119
 - 5. Photoelectrochemical Hydrogen Production, *Hawaii Natural Energy Institute, University of Hawaii at Manoa* II-124
 - 6. Photoelectrochemical Hydrogen Production Using New Combinatorial Chemistry Derived Materials, *University of California, Santa Barbara* II-130
 - 7. Discovery of Photocatalysts for Hydrogen Production, *SRI International* II-137
- D. Electrolysis
 - 1. Low Cost, High Efficiency Reversible Fuel Cell Systems, *Technology Management, Inc.* . . II-142
 - 2. High-Efficiency Steam Electrolyzer, *Lawrence Livermore National Laboratory* II-146
 - 3. High-Temperature Solid Oxide Electrolyser System, *Idaho National Engineering and Environmental Laboratory* II-150
- E. High-Temperature Thermochemical Processes
 - 1. Thermocatalytic CO₂-free Production of Hydrogen from Hydrocarbon Fuels, *Florida Solar Energy Center* II-155
 - 2. Analysis of Solar Thermochemical Water-Splitting Cycles for Hydrogen Production, *Florida Solar Energy Center* II-159

III. Hydrogen Storage. III-1

- A. Compressed/Liquid H₂ Tanks
 - 1. Hydrogen Composite Tank Project, *Quantum Fuel System Technologies Worldwide Inc.* III-3
 - 2. Development of a Compressed Hydrogen Gas Integrated Storage System (CH₂-ISS) for Fuel Cell Vehicles, *Johns Hopkins University Applied Physics Laboratory* III-7
 - 3. Next Generation Hydrogen Storage, *Lawrence Livermore National Laboratory* III-11
 - 4. Hydrogen Storage in Insulated Pressure Vessels, *Lawrence Livermore National Laboratory* III-15
 - 5. Low Permeation Liner for Hydrogen Gas Storage Tanks, *Idaho National Engineering & Environmental Laboratory* III-19
 - 6. Low Cost, High Efficiency, High Pressure Hydrogen Storage (New FY 2004 Project), *QUANTUM Technologies, Inc.* III-24
- B. Hydrides
 - 1. Catalytically Enhanced Hydrogen Storage Systems, *University of Hawaii* III-26
 - 2. Hydride Development for Hydrogen Storage, *Sandia National Laboratories* III-31
 - 3. Complex Hydrides for Hydrogen Storage, *Florida Solar Energy Center* III-38
 - 4. High Density Hydrogen Storage System Demonstration Using NaAlH₄ Based Complex Compound Hydrides, *United Technologies Research Center* III-43
 - 5. Discovery of Novel Complex Metal Hydrides for Hydrogen Storage through Molecular Modeling and Combinatorial Methods (New FY 2004 Project), *UOP Research Department* III-48
 - 6. Sub-Nanostructured Non-Transition Metal Complex Grids for Hydrogen Storage (New FY 2004 Project), *Cleveland State University* III-50

CONTENTS (Continued)

III. Hydrogen Storage (Continued)

- B. Hydrides (Continued)
 - 7. Complex Hydride Compounds with Enhanced Hydrogen Storage Capacity
(New FY 2004 Project), *United Technologies Research Center* III-52
- C. Carbon Materials
 - 1. Hydrogen Storage in Carbon Single-wall Nanotubes,
National Renewable Energy Laboratory III-54
 - 2. Doped Carbon Nanotubes for Hydrogen Storage,
Westinghouse Savannah River Technology Center III-61
 - 3. Hydrogen Storage in Metal-Modified Single-Walled Carbon Nanotubes,
California Institute of Technology III-65
 - 4. Carbon-based Sorbent Systems for an Effective Containment of Hydrogen
(New FY 2004 Project), *Air Products and Chemicals, Inc.* III-69
- D. Chemical Hydrides
 - 1. Process for the Regeneration of Sodium Borate to Sodium Borohydride for Use
as a Hydrogen Storage Source (New FY 2004 Project), *Millennium Cell, Inc.* III-71
 - 2. Chemical Hydride Slurry for Hydrogen Production and Storage
(New FY 2004 Project), *Safe Hydrogen, LLC* III-73
- E. New Materials
 - 1. Novel, Light-Element Nanostructured Materials for Hydrogen Storage
(New FY 2004 Project), *Nanomix, Inc.* III-75
- F. Testing
 - 1. Standardized Testing Program For Emergent Chemical Hydride And Carbon Storage
Technologies, *Southwest Research Institute* III-77

IV. Fuel Cells IV-1

- A. Transportation Power Systems
 - 1. Fuel Cell Systems Analysis, *Argonne National Laboratory* IV-3
 - 2. Fuel Cell Vehicle Systems Analysis, *National Renewable Energy Laboratory* IV-8
 - 3. Cost Analyses of Fuel Cell Stack/Systems, *TIAX LLC* IV-13
 - 4. Precious Metal Availability and Cost Analysis for PEMFC Commercialization, *TIAX LLC* IV-17
 - 5. DFMA Cost Estimates of Fuel-Cell/Reformer Systems at Low/Medium/High
Production Rates, *Directed Technologies, Inc.* IV-22
 - 6. Atmospheric Fuel Cell Power System for Transportation, *UTC Fuel Cells* IV-27
 - 7. Platinum Recycling Technology Development (New FY 2004 Project), *Ion Power, Inc.* IV-31
 - 8. Platinum Group Metal Recycling Technology Development
(New FY 2004 Project), *Engelhard Corporation* IV-33
- B. Transportation systems Components
 - 1. Cost and Performance Enhancements for a PEM Fuel Cell System,
Honeywell Engines, Systems & Services IV-35
 - 2. Development and Testing of a Toroidal Intersecting Vane Machine (TIVM)
Air Management System, *Mechanology, LLC* IV-39

CONTENTS (Continued)

IV. Fuel Cells (Continued)

B. Transportation systems Components (Continued)

3. Motor Blower Technologies for Fuel Cell Automotive Power Systems, *UTC Fuel Cells* IV-44
4. Hybrid Compressor/Expander Module, *TIAX LLC* IV-49
5. Carbon Foam for Fuel Cell Humidification, *Oak Ridge National Laboratory* IV-54

C. Stationary Power Systems

1. Proton Exchange Membrane Fuel Cell Power System on Ethanol, *Caterpillar Inc.* IV-58
2. New Proton Conducting Solid Sulfide Membranes for Intermediate Temperature Fuel Cells, *Iowa State University of Science and Technology* IV-62
3. Fuel Cell Distributed Power Package Unit: Fuel Processing Based on Autothermal Cyclic Reforming, *General Electric Company*. IV-67
4. Advanced Buildings PEM Fuel Cell System (New FY 2004 Project), *IdaTech, LLC* IV-71
5. 150-kW PEM Fuel Cell Power Plant Verification and Regional Demonstration of 150-kW PEM Fuel Cell Power Plant (New FY 2004 Project), *UTC Fuel Cells, LLC* . . . IV-73
6. Backup/Peak Shaving Fuel Cell Systems - Design and Development of the GenCore™ II (New FY 2004 Project), *Plug Power Inc.* IV-75
7. Economic Analysis of PEMFC Systems (New FY 2004 Project), *Battelle* IV-77

D. Fuel Processing Subsystem and Components

1. Water-Gas Shift Catalysis, *Argonne National Laboratory* IV-79
2. Catalysts for Autothermal Reforming, *Argonne National Laboratory*. IV-83
3. Development of Novel Water-Gas-Shift Membrane Reactor, *The Ohio State University* . . . IV-88
4. On-Board Vehicle, Cost Effective Hydrogen Enhancement Technology for Transportation PEM Fuel Cells, *United Technologies Research Center* IV-93
5. Plate-Based Fuel Processing System, *Catalytica Energy Systems* IV-98
6. Quick-Starting Fuel Processors - A Feasibility Study, *Argonne National Laboratory*. . . . IV-103
7. Fast Start Reformer Components, *Los Alamos National Laboratory*. IV-107
8. Reformate Cleanup: The Case for Microchannel Architecture, *Pacific Northwest National Laboratory* IV-113
9. Microchannel Steam Reformation of Hydrocarbon Fuels, *Pacific Northwest National Laboratory* IV-119
10. Fuel Processors for PEM Fuel Cells, *University of Michigan* IV-124
11. Sulfur Removal from Reformate, *Argonne National Laboratory* IV-129
12. Selective Catalytic Oxidation of Hydrogen Sulfide, *Oak Ridge National Laboratory* IV-133
13. Effects of Fuel Constituents on Fuel Processing Catalysts, *Argonne National Laboratory* . . . IV-138
14. Testing of Fuels in Fuel Cell Reformers, *Los Alamos National Laboratory* IV-142
15. Development of Reaction Kinetics for Diesel-Based Fuel Cell Reformers, *National Energy Technology Laboratory* IV-147
16. Reforming of Diesel Fuel for Transportation Applications, *Argonne National Laboratory* . . . IV-153
17. Advanced High Efficiency Quick Start Fuel Processor for Transportation Applications, *Nuvera Fuel Cells, Inc.* IV-157
18. Development of a 50-kW Fuel Processor for Stationary Fuel Cell Applications Using Revolutionary Materials for Absorption-Enhanced Natural Gas Reforming (New FY 2004 Project), *ChevronTexaco Technology Ventures* IV-163

CONTENTS (Continued)

IV. Fuel Cells (Continued)

E. Fuel Cell Stack Subsystem and Components

1. Integrated Manufacturing for Advanced Membrane Electrode Assemblies, *De Nora N.A.* . . . IV-165
2. Development of High Temperature Membranes and Improved Cathode Catalysts, *UTC Fuel Cells* . . . IV-171
3. Advanced MEAs for Enhanced Operating Conditions, *3M Company* . . . IV-178
4. Ultra-Thin Composite Membrane-Electrode Assembly For High-Temperature Proton Exchange Membrane Fuel Cells, *FuelCell Energy, Inc.* . . . IV-184
5. Development of High-Performance, Low-Pt Cathodes Containing New Catalysts and Layer Structure, *Cabot Superior MicroPowders* . . . IV-188
6. Design and Installation of a Pilot Plant for High-Volume Electrode Production, *Southwest Research Institute* . . . IV-194
7. Scale-Up of Carbon/Carbon Composite Bipolar Plates, *Porvair Fuel Cell Technology, Inc.* . IV-197
8. Carbon Composite Bipolar Plates, *Oak Ridge National Laboratory* . . . IV-202
9. Cost-Effective Surface Modification for Metallic Bipolar Plates, *Oak Ridge National Laboratory* . . . IV-206
10. High-Performance, Matching, PEM Fuel Cell Components and Integrated Pilot Manufacturing Processes, *3M Company* . . . IV-211
11. High-Temperature Membranes, *Case Western Reserve University* . . . IV-217
12. Electrodes for Polymer Electrolyte Membrane Operation on Hydrogen/Air and Reformate/Air, *Los Alamos National Laboratory* . . . IV-221
13. New Electrocatalysts for Fuel Cells, *Lawrence Berkeley National Laboratory* . . . IV-226
14. Low-Platinum Catalysts for Oxygen Reduction at Proton Exchange Membrane Fuel Cell Cathodes, *Naval Research Laboratory* . . . IV-231
15. Low Platinum Loading Catalysts for Fuel Cells, *Brookhaven National Laboratory* . . . IV-236
16. Direct Methanol Fuel Cells, *Los Alamos National Laboratory* . . . IV-241
17. Development of Advanced Catalysts for Direct Methanol Fuel Cells, *California Institute of Technology* . . . IV-248
18. Novel Approach to Non-Precious Metal Catalysts (New FY 2004 Project), *3M Company* . . . IV-253
19. Novel Non-Precious Metals for PEMFC: Catalyst Selection Through Molecular Modeling and Durability Studies (New FY 2004 Project), *University of South Carolina* . . . IV-255
20. Development of a Thermal and Water Management System for PEM Fuel Cells (New FY 2004 Project), *Honeywell International Inc.* . . . IV-257
21. Development of Polybenzimidazole-based, High-Temperature Membrane and Electrode Assemblies for Stationary and Automotive Applications (New FY 2004 Project), *Plug Power, Inc.* . . . IV-259
22. Development, Characterization, and Evaluation of Transition Metal/Chalcogen Based Cathode Catalysts for PEM Fuel Cells (New FY 2004 Project), *Ballard Power Systems Corporation* . . . IV-261
23. PEM Stack Durability (New FY 2004 Project), *DuPont Fuel Cells* . . . IV-262
24. MEA and Stack Durability for PEM Fuel Cells (New FY 2004 Project), *3M Company* . . . IV-263
25. Development of a Low-Cost, Durable Membrane and Membrane Electrode Assembly for Stationary and Mobile Fuel Cell Applications (New FY 2004 Project), *Atofina Chemicals, Inc.* . . . IV-265

CONTENTS (Continued)

IV. Fuel Cells (Continued)

F. Crosscutting Fuel Cell Characterization and Evaluation

1. Neutron Imaging Study Of the Water Transport Mechanism in a Working Fuel Cell,
National Institute of Standards and Technology IV-267
2. Low-Friction Coatings and Materials for Fuel Cell Air Compressors,
Argonne National Laboratory. IV-271
3. Bipolar Plate-Supported Solid Oxide Fuel Cell, *Argonne National Laboratory* IV-275
4. Assessment of Fuel Cell Auxiliary Power Systems for On-Road Transportation
Applications, *TIAX LLC* IV-279
5. Evaluation of Partial Oxidation Fuel Cell Reformer Emissions, *TIAX LLC* IV-284
6. Modeling and Control of a Solid Oxide Fuel Cell Auxiliary Power Unit,
Pacific Northwest National Laboratory IV-288
7. Montana PEM Membrane Degradation Study, Year 1 Report, *CTA*. IV-294
8. Microstructural Characterization of PEM Fuel Cells, *Oak Ridge National Laboratory* IV-300

V. Technology Validation V-1

1. Validation of an Integrated System for a Hydrogen-Fueled Power Park,
Air Products and Chemicals, Inc.. V-3
2. Novel Compression and Fueling Apparatus to Meet Hydrogen Vehicle Range
Requirements, *Air Products and Chemicals, Inc.*. V-6
3. Hawaii Hydrogen Power Park, *State of Hawaii Department of Business* V-8
4. Hydrogen Power Park, *DTE Energy Company*. V-14
5. Power Parks System Simulation, *Sandia National Laboratories* V-18
6. Filling Up With Hydrogen 2000, *Stuart Energy USA*. V-22
7. Hydrogen Refueling Technology, *HyRadix, Inc.* V-26
8. Fuel Cell Installation and Demonstration Project In Gallatin County, Montana,
Zoot Enterprises, Inc. V-30
9. Global Assessment of Hydrogen-Based Technologies,
University of Alabama at Birmingham V-32
10. Advanced Thermal Hydrogen Compression, *Ergenics, Inc.* V-36
11. Uninterrupted Power Source, *Apollo Energy Systems, Inc.* V-41
12. Development of a Hydrogen Fuel Based Power Park (New FY 2004 Project),
Pinnacle West Capital Corporation V-44

VI. Integrated Hydrogen and Fuel Cell Demonstration/Analysis VI-1

A. System Analysis

1. Research and Development of a Proton Exchange Membrane Fuel Cell, Hydrogen
Reformer, and Vehicle Refueling Facility, *Air Products and Chemicals Inc.* VI-3
2. Fuel Choice for Fuel Cell Vehicles: Stakeholder Risk Analysis, *TIAX, LLC*. VI-8
3. Hydrogen Commercialization: Transportation Fuel for the 21st Century,
SunLine Services Group VI-12

B. Demonstration

1. Development of a Turnkey Commercial Hydrogen Fueling Station,
Air Products and Chemicals, Inc.. VI-17

CONTENTS (Continued)

VI. Integrated Hydrogen and Fuel Cell Demonstration/Analysis

B. Demonstration

2. Development of a Natural Gas to Hydrogen Fuel Station, *Gas Technology Institute* VI-22
3. Fuel Cell-Powered Front-End Loader Mining Vehicle, *Vehicle Projects, LLC* VI-27
4. Advanced Underground Vehicle Power and Control Fuel Cell Mine Locomotive,
Vehicle Projects, LLC VI-31
5. UNIGEN[®] Regenerative Fuel Cell For Uninterruptible Power Supply,
Proton Energy Systems VI-35

VII. Safety and Codes & Standards.VII-1

A. Safety and Codes & Standards

1. Codes and Standards Analysis, *University of Miami*. VII-3
2. Hydrogen Codes and Standards, *National Renewable Energy Laboratory*. VII-6

B. Sensors for Safety and Performance

1. Carbon Monoxide Sensors For Reformate Powered Fuel Cells,
Los Alamos National Laboratory VII-11
2. Electrochemical Sensors for Proton Exchange Membrane Fuel Cell Vehicles,
Lawrence Livermore National Laboratory VII-16
3. Interfacial Stability of Thin Film Sensors, *National Renewable Energy Laboratory* VII-21
4. Development of Sensors for Automotive Fuel Cell Systems,
United Technologies Research Center. VI-26
5. Micro-Machined Thin Film H₂ Gas Sensors, *ATMI, Inc.* VII-30
6. Sensor Development for Proton Exchange Membrane Fuel Cell Systems,
Honeywell Sensing and Control VII-34
7. Gallium Nitride Integrated Gas/Temperature Sensors for Fuel Cell Systems, *Fluence* VII-39
8. Fiber Optic Temperature Sensors for PEM Fuel Cells, *Oak Ridge National Laboratory*. VII-42
9. Hydrogen Composite Tank Project (New FY 2004 Project),
University of California, Irvine VII-47

VIII. Education.VIII-1

1. Education Program Element Planning and Multi-Year R,D&D Plan Development,
U.S. Department of Energy VIII-3
2. Baseline Knowledge Assessment, *Oak Ridge National Laboratory*. VIII-6
3. Database of Existing Hydrogen and Fuel Cell-related Courses and Research Activities
at Universities, *University of Tennessee* VIII-8

IX. Conversion Devices.IX-1

A. Turbines

1. Reduced Turbine Emissions Using Hydrogen-Enriched Fuels, *Sandia National Laboratories*. . . IX-3

B. Internal Combustion Engines

1. Developing a Thermodynamic Fuel Cell, *Sandia National Laboratories*. IX-8
2. HCNG Heavy Duty Vehicle Prime Mover, *Collier Technologies, LLC* IX-13

X. Acronyms and AbbreviationsX-1

XI. Primary Contact ListXI-1
